

Right Handed
Shooters ONLY!

Shooters placing shots the farthest distance from the target center are likely to benefit the most from the suggested corrective action. Please begin by using this target at the recommended distance of 7 yards. If you are capable of placing 5 shots within the heavy black inner circle (2.5") place the target at a longer distance (up to 15 yards max.) to allow for more accurate analysis of your shooting behavior. This target should not be used for analysis purposes beyond 15 yards.
